

a microscope and Oct. 5, 1944 get
back to college Somewhere in China

Not much new here, I do the same
Dear Mom,
Well, I now have 12 rolls of
film but no camera and no
printing paper to develop them
with either. You'd better put
what you send me in strong box
or I'll never get it. I have been
getting the funny books fine even
the two together but no U.M.I.
magazine, try to get another one
will you. You can send me a good
camb, I've decided to let my hair
grow out, and I'd like a pipe,
and of course plenty of candy.

I am really learning plenty in
the lab. I'll know a lot about

a microscope and etc. When I get back to college.

Not much new here, I do the same thing every day. Get up at 0630, eat and wash, go to work at 0800, eat at 1145, go back to work at 1:00, quit at 5:00 and eat, play some sport, go to the show every other night at 7:00, go to bed about 9:30 or 10. I get almost every other afternoon off. Well guess I'd better sign off now. Don't work too hard - say why don't you and Dr. Price take turns in closing up at 7 P.M. Will write again soon.

your loving son,

Jimmie
