

Monday, March 12th.

Dear Myam,

Sorry I haven't written in such a long time but almost every night I have been going to bed before 9:00. after work each day we usually play softball or Volley ball and are pretty tired after we come in and take a shower - the weather is wonderful now - nights cool and days warm.

I haven't done anything more about O.C.S. I really don't care about it anymore - I'm happy just as I am - our lab. officer said that he would send some of us to lab. tech. school in China if we wanted to go - sometime next summer.

Lab. is being enlarged - we really need it - step on top of each other all the time. at present the main thing I do is look for T.B. and prep. an. slides I make, look for g.c. an. slides, and do Sedimentation Rates; and Kohus.

(2)

Say I found a kid an one of the
wards who lives between Kenbridge and
Victoria. His name is Moody - was shot
in foot, he really is a swell kid - I don't
care for my knee so I gave him mine for
the month. The rest of the patients tease
him about his Va. aunt so I have to go
over and help him out.

Am sending some Chinese dolls home - will
you send one to Grace, Mildred, Juliet Lynch,
give one to Ellen Lipsitz, and keep one for
yourself. I want to remind that order about
sweets, send as much as you want, we
got the choc. almonds and ate them all
up the first day. Also send me as many
"T" shirts as possible. I have some more
socks and shorts I haven't gotten the
others you sent yet.

Well guess I'd better sign off now - will
write better from now on. am o.k. and feel
fine.

Your loving son,

Jimmy
