

UNITED STATES ARMY

Sunday, 27 May

Dear Mom,

Well we're here at last; the ride was much better than I expected, we came thru without even an accident to any of the trucks and we went over the worse roads I've ever been over - one mountain had 24 S turns in it and the roads were wet all the way except the last day. Some of the mountains were so high up we were traveling above the clouds. The scenery was the most beautiful I believe I've ever seen - we passed a huge waterfall that will rival almost any we have in the states -

The set up here is going to be very nice - we have three two story brick buildings to work in, they even have stone floors - the hosp. is at the base of a mountain and our quarters are on the side - the climb up almost takes your breath away -

UNITED STATES ARMY

(2)

We live in tents but they are weatherproofed and are very nice - four men to a tent and three of them in this tent are from Ia. The food is very good - We even have a swimming hole in the river that flows nearby - the river is clear and the hole is under a small falls - as I said we are right on a mountain, if we step ten feet away from our tents we are in the woods - The only drawback about the whole place is the weather - it's damp most of the time and rains a lot.

Well I guess that's about all for to - night, I'll write again soon I'm O.K. and feeling fine.

your loving son,
Jimmy

P.S. about the mail it's going to take a lot longer both coming and going because we can't get it by plane here but keep writing air mail.
